

**CALIFORNIA ENVIRONMENTAL QUALITY ACT
NOTICE OF DETERMINATION**

To: Office of Planning and Research
State Clearinghouse
P.O. Box 3044, 1400 Tenth Street, Room 212
Sacramento, CA 95812-3044

From: Department of Toxic Substances Control
Office of Permitting
8800 Cal Center Dr.
Sacramento, CA 95826

Subject: FILING OF NOTICE OF DETERMINATION IN COMPLIANCE WITH SECTION 21108 OR 21152 OF THE PUBLIC RESOURCES CODE

Project Title: Safety-Kleen Sacramento Facility Modifications and Permit Renewal

State Clearinghouse No.: 2018042079

Project Location: 6000 88th Street Sacramento, CA 95828

County: Sacramento

Project Description: The California Department of Toxic Substances Control (DTSC) has adopted a Negative Declaration and approved the modifications and renewal of the Hazardous Waste Facility Permit (Permit) for Safety-Kleen Systems, Inc. (Safety Kleen), as authorized by the California Health and Safety Code, Chapter 6.5, and the Resources, Conservation and Recovery Act (RCRA). Safety Kleen currently operates under a Permit issued on June 28, 2006. A permit renewal authorizes the continued transfer, treatment, and storage of hazardous waste. The facility is not a hazardous waste disposal facility. **The Permit became effective on July 30, 2018 and will expire on July 30, 2028.**

Safety-Kleen Systems, Inc. (Safety-Kleen) is an international service-oriented company whose customers are primarily engaged in automotive repair, industrial maintenance and dry cleaning. The 3.37-acre Sacramento Facility was opened in 1996 and offers services which include the accumulation and storage of several spent materials collected from its customers.

Safety-Kleen proposed in their permit renewal application the following changes to their Sacramento facility:

- Construction of two additional 25,000-gallon aboveground storage tanks for storage and transfer of used oil, spent antifreeze, and non-hazardous waste water (e.g., oily water);
- Increase the size of the aboveground storage tanks that were previously approved to operate in the 2006 hazardous waste permit but never constructed from 12,400 gallons and 24,650 gallons to 25,000 gallons. These tanks are also to be used for the storage and transfer of either used oil, spent antifreeze, and non-hazardous waste water;
- Store up to 10,560 gallons of hazardous waste in containers in an additional area located in a warehouse building currently located onsite.

As Lead Agency a Responsible Agency under the California Environmental Quality Act (CEQA), DTSC approved the above-described project on June XX, 2018 and has made the following determinations:

1. The project will will not have a significant effect on the environment.
2. A Negative Declaration Mitigated Negative Declaration Environmental Impact Report was prepared for this project pursuant to the provisions of CEQA.
3. Mitigation measures were were not made a condition of project approval.
4. A Statement of Overriding Considerations was was not adopted for this project.
5. Findings were were not made pursuant to the provisions of CEQA.

This is to certify that the final environmental document, comments, and the record of project approval are available to the public at the following location:
