Sacramento, CA 95826

Subject: FILING OF NOTICE OF DETERMINATION IN COMPLIANCE WITH SECTION 21108 OF THE PUBLIC RESOURCES CODE

Project Title: Clean Harbors Environmental Services, Inc. Port of Redwood City Facility Standardized Hazardous Waste Facility Permit Series B

State Clearinghouse No.: 2001092097

Project Location: 695 Seaport Boulevard, Redwood City, CA 94063

County: San Mateo

Project Description: The Department of Toxic Substances Control (DTSC) approved the Standardized Hazardous Waste Facility Permit Series B pursuant to California Health and Safety Code Section 25201.6 for the existing Clean Harbors Environmental Services, Inc. Port of Redwood City Facility (Facility).

The Facility (previously Romic Environmental Technologies Corporation) is currently operating under the Standardized Hazardous Waste Facility Permit issued by DTSC in 2002 which expired in 2012. The Facility is a non-Resource Conservation and Recovery Act (non-RCRA) hazardous transfer facility. The Facility stores and transfers a variety of hazardous wastes, predominately spent solvents. Liquid hazardous wastes with the same United States Department of Transportation (DOT) shipping description are transferred between tanker trucks and railcars under the federal exemption for transporters identified in Title 40, of Code of Federal Regulations, section 263.12.

The Facility consists of 550-feet of rail spur, bulk loading equipment, a secondary containment system, truck driveway with a turning area, air pollution control equipment, firefighting equipment, and a container loading dock. The Facility does not have any tanks other than those associated with the air pollution control devices and the stormwater storage container. These containers are under the generator requirements and not regulated by this permit. The approved Permit (referred to as a permit re-issuance) would allow the Facility to continue the storage and transfer of Resource Conservation and Recovery Act (RCRA) and Non-RCRA hazardous waste between tanker trucks and railcars.

The project does not include any substantial changes to facility components.

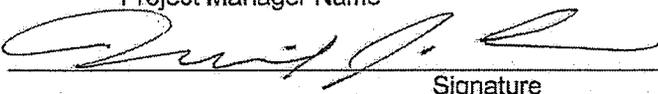

The Permit would be in effect for 10 years and would subject the Facility to the terms and conditions set forth in the Permit and the Standardized Permit Application dated November, 2015. The Standardized Permit Application would be incorporated by reference into the Permit.

As Lead Agency a Responsible Agency under the California Environmental Quality Act (CEQA), DTSC approved the above-described project on July 28, 2016 and has made the following determinations:

1. The project will will not have a significant effect on the environment.
2. A Negative Declaration Mitigated Negative Declaration Environmental Impact Report was prepared for this project pursuant to the provisions of CEQA.
3. Mitigation measures were were not made a condition of project approval.
4. A Statement of Overriding Considerations was was not adopted for this project.
5. Findings were were not made pursuant to the provisions of CEQA.

This is to certify that the final environmental document, comments and responses, and the record of project approval are available to the public at the following location:
