TECHNICAL REVIEW, SECOND NOTICE OF DEFICIENCY FOR THE PERMIT
RENEWAL APPLICATION FOR THE P KAY METAL, INC. FACILITY
(EPA ID NUMBER CAL000024110)

Dear Mr. Cabana:

The Department of Toxic Substances Control (DTSC) received the revised facility Operation Plan permit renewal for the P Kay Metals, Inc. facility located at 2448 East 25th Street, Los Angeles, California. The revised Operation Plan was sent via e-mail on June 27 and 30, 2008. The Operation Plan was revised to conform to the new DTSC format contained in the DTSC Operation Plan Instructions and to address the deficiencies in the First Notice of Deficiencies. The revised Operation plan is unacceptable. It contains more deficiencies than the 2002 Operation Plan. The revised Operation Plan did not address or provided all the information requested from the DTSC Operation Plan Instruction, had drawings and diagrams from the previous facility layout.

Please provide a good quality and complete Operation Plan including figures, diagrams and maps. Please note that this is the second Notice of Deficiency. If the applicant fails to correct deficiencies or does not respond to the third notice of deficiencies, the Department may deny your permit.

Enclosed is the second Notice of Deficiency (NOD). Please submit the revised Operation by August 15, 2008.

Mr Gary Cabana
